

FIRE WALL

THE BEST PURIFICATION

The WL2 is designed for every situation, and is built for the demanding working environment. Equipped with all the prerequisite hygienic features such as carbon filtration, BioCote antimicrobial protection, APMS technology (Automatic Purification System) and the latest water purification system, Firewall. These features ensure that the WL2 water cooler delivers the purest water on the market.

This is the ideal machine where quality drinking water and cost-effectiveness are a prime need.

PRODUCT SPECIFICATIONS

Available Options: Cold, Hot and Cold, Cold and Ambient

Versions: mini or freestanding

Display: button driven display simplifies use of machine

UV Lamp: 11 W UV Lamp

Standard Filtration: GAC Filter (Granular Active Carbon) to reduce chlorine, dirt particles and pesticides

Firewall System: the ultimate technology for the purification of your water

APMS System: APMS systems monitors the working of the UV lamp

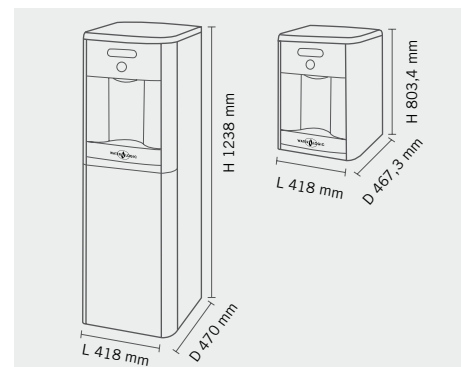

UV Alarm: audible alarm inform the end user if the UV lamp is working

Hot Tank Capacity: 1.5 liters (0.396 US gal.)

Cold Tank Capacity:
Freestanding: 4.0 litres (1.1 US gal.)
Mini: 2.0 litres (0.53 US gal.)

Bottle fill dimension: >210mm (>8.25in.)

Colour: charcoal silver

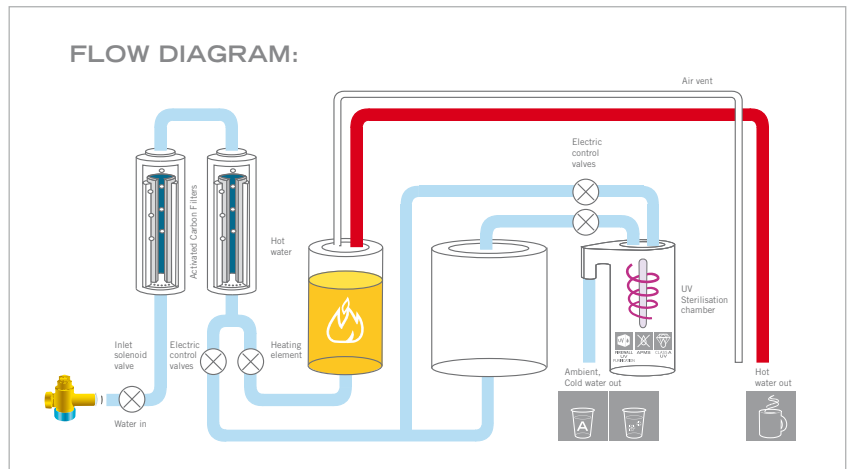

FIRE WALL

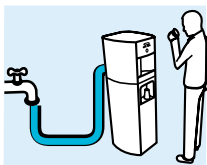

KEY BENEFITS OF THE WATERLOGIC 2

- Smart repositioning of the UV lamp at the point of dispense, permits cold, sparkling and ambient water, to pass through the UV system just before being dispensed into your cup.
The patent pending Firewall design also eliminates the problem of back contamination from outside the machine that may affect the water.
- Carbon filters remove impurities from the water, and also improve taste, without removing any of the important trace minerals.
- Safe and clean drinking water is further ensured by the use of the BioCote™ anti-microbial silver based technology that protects the plastic surfaces surrounding the dispensing area from any build up of bacteria.
- Purification guarantee from the inbuilt APMS (automatic purification monitoring system) that will shut down the dispenser when the UV lamp is not working.
- Additional office working space becomes available due to the removal of water bottles.
- Constant water supply from the easy connection to the mains water source.
